The screenshot shows the '1. Type' section with 'text' selected. The '2. Contents' section has a large text input field. Below the input field, it says '53 characters' and provides a hint: 'Hint: The shorter, the better. Some older scanner apps are having problems with texts longer than about 300 chars.' A security notice at the bottom states: 'Your QR code data is encrypted during transmission (TLS/SSL) and not stored.'
