Project idea:

1. I want my pupils to exchange experiences about their teenage life with pupils in countries all over Europe. My goal is to broaden their minds and increase the tolerance towards foreigners because what you don't know, you are afraid of. I'm not yet sure what tools I want to use but I'm open to any suggestion. Maybe an Internet Magazine.
2. Jag vill ha kontakt med skolor i Norge och Danmark. I läroplanen för svenska språket står det att eleverna ska ha kunskaper i de nordiska språken och ofta består detta i att man läser en eller ett par texter på norska och danska. Jag skulle vilja låta mina elever skriva på svenska och få tillbaka texter på norska och danska. De skulle t.ex. kunna ha vissa ämnen att diskutera och sedan kanske upprätta ordlistor åt varandra. På så vis får de kunskaper om språket samt lite information om hur det är att vara ung i Norden. Om någon vill ha ett samarbete så får vi tillsammans diskutera verktyg och form.

Project idea: Getting to know one another through video

We are a team of teachers working with children eight years of age, interested in getting to know a class in another European country. We want to use video as a means of communication, showing each other small clips and movies from our every day life. Only our imagination sets the limit on what we share with each other. The topics of our movies can vary but the theme should be "getting to know each others culture".

The teddy bear exchange: We are a team of teachers, working with two groups of children who are in the ages of six to seven years. Our idea for this project is to send a "teddy bear" between two classes and let the children take it home. At home the children write in a diary about the teddy bears stay. If necessary their parents can help them. Hopefully this project gives the children knowledge about new countries and cultures. (The classes can also send drawings and videos to each other.)

Project idea: Our school has pupils with parents from many places round the world. We think that this international experience is worth a lot. There are a number of areas that we could be interested in developing with friends from all Europe. This year we work a lot with science - the great Swedish scientist Linné was born 300 years ago and we are a part of the national programme for developing new methods in science. Our students are 6-12 years old. Yes, but they seem to be in some way working with this a bit odd "replacement of Springday 2007". We'll keep an eye on this.

Project idea: Our school is in the middle of Sweden, not far from our capital. Our pupils live both in the countryside as well as close to a big city.

We would like to get to know you, and to exchange experiences with you.

- What do you do in your spare time?
- How is it to live in your country?
- What sort of dreams for the future do you have?

We do a magazine every year, in which we write articles about our life here in our town as well as about love, theatre and culture.

We would be very excited if you would like to get to know us and tell us about you.

Perhaps we could exchange magazines, video clips or letters.

Project idea: Students' future goals

What opportunities would you like to have in life? What do you want to accomplish now and in the future? What do you need to achieve these goals? It would be interesting to compare the responses of students internationally by using podcasting. What makes you happy? Think about what makes you happy and feel good. Of course it can be a lot of different things: a place you really like or something that is special to you. Use a photo and write about what makes you happy. Write these sentences again in a second language that you are studying. Make a podcast with more information.

We have already an established contact with Denmark, Norway and Finland

Name of school: Borgarskolan

E-mail contact: peter.sundquist@gavle.se

Age of pupils: 16 - 19

Project language: English

Project idea: A project with students in business administration and economics working with entrepreneurs and teaching students about starting companies and thinking as problem solvers. Perhaps in "Young Enterprise" "Junior Achievement". At our school the students run a company for a year. They decide which products they to sell and they do everything that is involved when you run a company. If there are schools doing the same or schools that want to know more about this and perhaps run a project that the students from both countries could have benefit of it would be great. In a bigger context the project will build understanding between countries and students. Our students study for example Economics in the world with emphasis on the EU. Economic development in Sweden compared with Central Europe. Differences, or if it looks all the same, in marketing could be another subject to do projects about.

Project idea: Young in Europe. Students interview each other via mail about how it is to grow up in the country of the collaborating school. Their teachers first jointly decide what the students need to find out. This will enable the student to learn more about how it is to grow up in different countries and they get to use their knowledge of English as a tool when working on this subject.

Name of school: Stockholms Transport and Fordontekniska Gymnasium (STFG)

E-mail contact: jonathan.east@utbildning.stockholm.se

Age of pupils: 16 - 19

Project language: English

Project idea: At STFG we want to start an eTwinning project with a school which teaches courses in car mechanics. We're a bunch of students who love everything on four wheels. You can say that petrol runs in our blood! We're really keen to find other European students who share our passion in cars and who we can email or chat with on a regular basis. It would be great if we could, for example work together on a project or perhaps exchange answers to questions which we both work with.
